

L A M P S L I T E

— NICE TO LIGHT YOU AGAIN —

L A M P S L I T E

LAMPS LITE began like a dream where we could have the liberty of exploding our imagination creating romantic scenarios full of harmony. We started to dig into what our clients expected, and thanks to the help of many talented artists, craftsmen and designers inside our country, fully passionate for their jobs, is how this dream began to take shape and form.

We support the "Made in México" and we were able to create a team of craftsmen who work different materials such as; steel, metal, wood, copper, brass, among others, and we feel really proud to present our first pendant lighting line.

Our main objective is, and will always be create new lines that support our local market and satisfy every customer by selling an excellent product at a fair price.

This first line was inspired by simple forms we see every day, starting with geometric forms that gives life to the bulb itself and finishing in an awesome piece.

LOS TOLOS

Handcrafted metal wire pendant light series. Inspired in simple geometric forms where the main character is the light source itself.

Its structure contains the space that surrounds the bulb.

U - 3 2

U32-1 introduces our U32 line of lighting artifacts developed for lamp manufacturer LampsLite. Constructed entirely from metal, U32-1 explores the concept of modern lighting, taking heavily from contemporary urban trends; particularly the tension and structure of the modern city landscape.

Composed from two icosahedric geometries the lamp presents a distinct angular dialogue, between surface and frame.

T O B R E
—

Hammered Copper pendant light series. Simple pieces of copper, hammered by Mexican artisans in order to reflect the light in different patterns.

Beautiful work by local reknown craftsmen.

T E T E

Molded Concrete pendant light series. Inspired from ancient Mexican ruins, as if collected from scattered pieces of crafted stone ornaments.
