Perla
mosaico ♦ artesanal

La Perla Mosaico artesanal es un proyecto que nace con el deseo de restablecer la tradición del mosaico hidráulico a nuestras calles y casas mexicanas.

Como fabricantes valoramos la dedicación y el esfuerzo que se esconde detrás de cada un de nuestros mosaicos y queremos expresarlo a través de nuestro trabajo.

DISEÑOS PERSONALIZADOS

Si tienes una idea en mente y no está ese diseño en el catálogo, podemos fabricar un molde con un diseño personalizado.

Estos mosaicos están hechos a mano de manera artesanal, por lo que el grosor y el peso nunca serán exactos.

DATOS TÉCNICOS

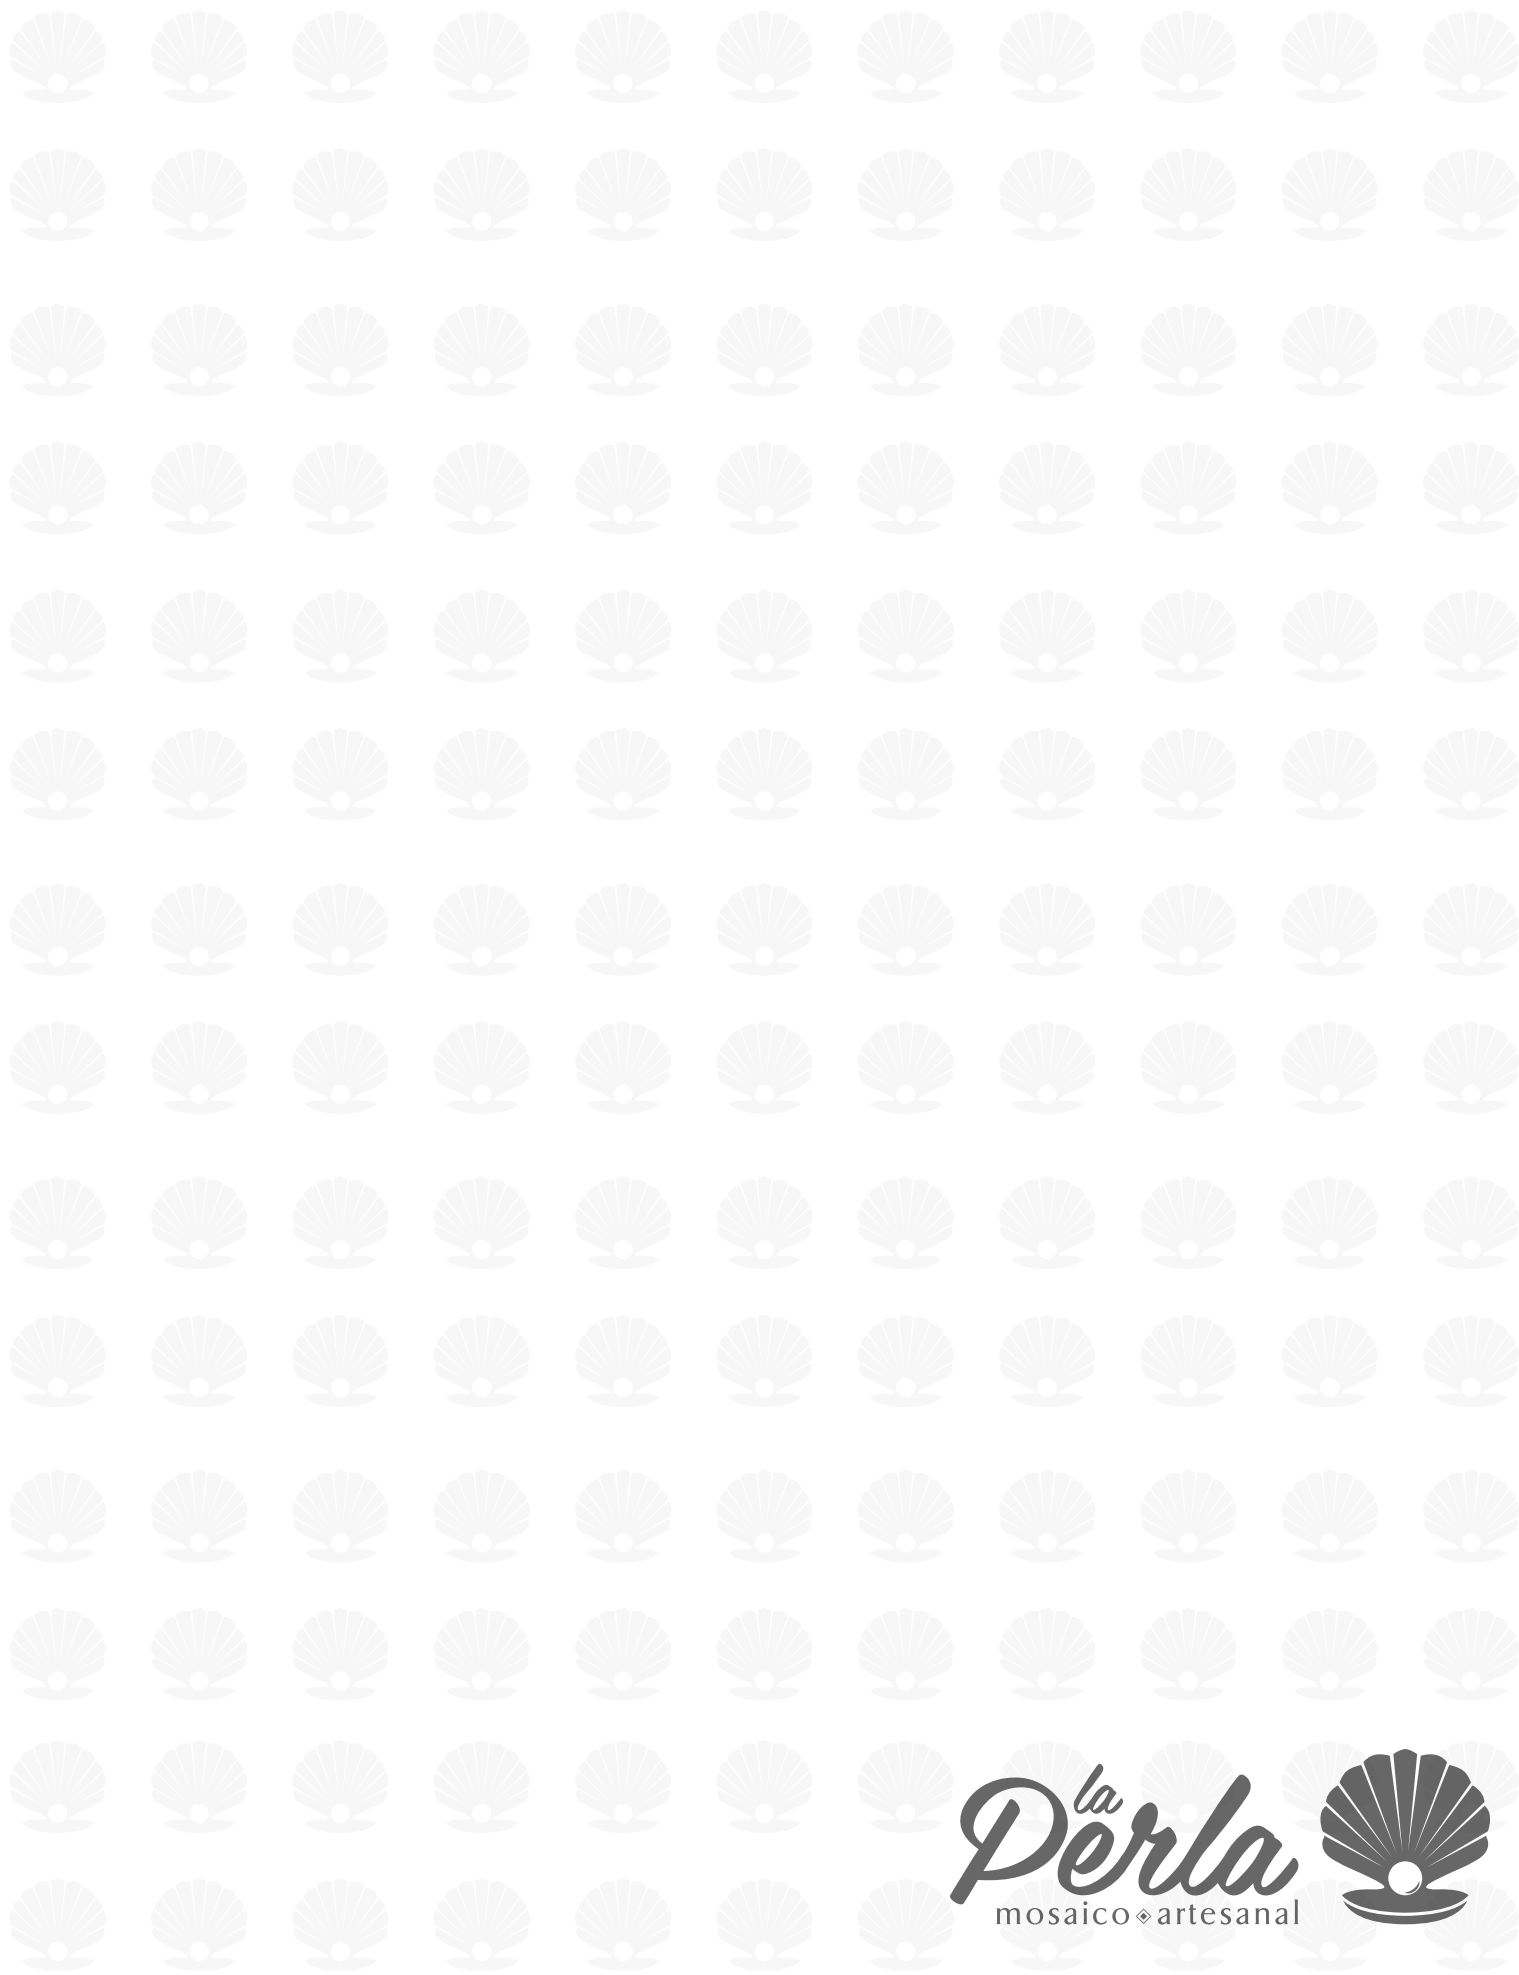

La medida estándar de un mosaico de pasta o mosaico hidráulico es de 20 x 20 x 2cm y pesa 1.3 kg aproximadamente.

Cada mosaico consta de tres capas que se unen a la hora de fabricarlo:

La primera capa denominada pasta o color, es la parte visible de la pieza una vez instalada. Está compuesta de polvo de mármol o marmolina, cemento, pigmento en polvo y agua. El grosor de esta capa no debe ser menor a 2 mm.

La segunda capa conocida como secante o polvo, es una mezcla de arena de río seca y cemento. El grosor de esta capa es de 4 a 5 mm.

La tercera capa, que es la que le da resistencia al mosaico, está compuesta por arena de río húmeda y cemento. El grosor de esta capa es de 11 - 13 mm.
