

RO SOLUTIONS

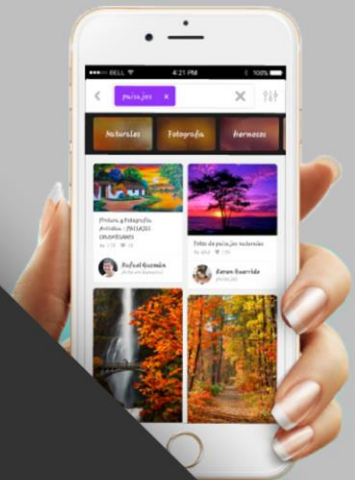

Software Development

TECHNOLOGICAL DEVELOPMENT

Web design, Mobile apps, tailored
information systems

RO Solutions serves users and businesses which are looking to have a bigger presence on the internet, to give added value to their activities, ideas, and specific projects.

WE ARE EXPERTS IN:

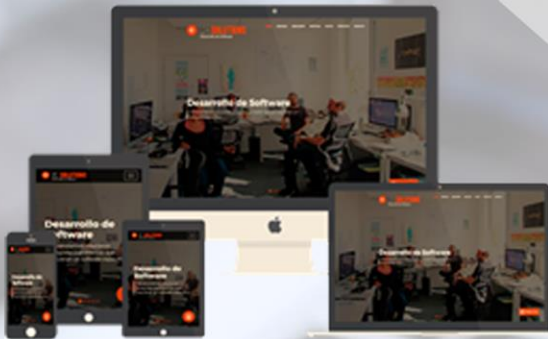

► NATIVE APP DEVELOPMENT

Our team has developed android apps for a broad variety of devices, our team is expert in creating and launching quality apps that get adjusted to your needs.

We are specialized in iOS app development for iPhone and iPad. We are familiarized with project conceptualization, user experience and app development.

► WEB DEVELOPMENT

We work with web development and quality web systems. We make use of new technology standards such as HTML5, CSS3, JavaScript, NodeJS, and more. We offer you a personalized solution for each situation.

► REAL-TIME DATA MONITORING SOFTWARE

It is a digital system which interacts in an active way with a real process in relation to its ins, outs, and temporal restrictions to provide a correct performance, by this way you ensure predictability, stability, controllability, and scope of results.

- Assets Monitoring • Production Monitoring • Float Monitoring
- Employee Monitoring • Predictive Maintenance

► 360° PHOTOGRAPHY AND VIDEO

Interactive video and graphic content have an important place in the web.

WHAT IF INSTEAD OF A SINGLE POINT OF VIEW YOU COULD OFFER 360° CONTENT IN YOUR VIDEOS OR GRAPHICS?

► IT CONSULTING

- Technology consulting oriented to give specific solutions to a broad variety of requirements.
- Our objective is to involve your company (any size businesses) with the new technologies of information.
- We offer structure and conceptualization of projects from scratch.

► DESKTOP SYSTEMS

We develop utility software for your business, such as; employee control, accounting, points of sale (PoS), and related systems to the control of your businesses always using the technology that best adapts to your needs.
