

PAIMEX

Asociación Mexicana de Industriales
Acabados Superficiales

Welcome to PAIMEX

At PAIMEX, we specialize in high-quality metal surface treatment and coating services. Our offerings are organized into specific categories to help you easily find the services you need.

Anodizing Services

Certified under ISO 9001:2015, AS9100D, Nadcap AC7108 for all types:

- **Type I (MIL-A-8625):** Enhances corrosion resistance and paint adhesion for aluminum and its alloys.
- **Type II (MIL-A-8625):** Provides a durable and aesthetic finish in a wide range of colors, enhancing abrasion resistance.
- **Type III (MIL-A-8625):** Offers a thicker and more durable coating, ideal for high-demand applications.

Conversion Coatings and Passivation

Certified under ISO 9001:2015, AS9100D, Nadcap AC7108:

- **Chemical Conversion Coatings on Aluminum (MIL-C-5541):** Improves paint adhesion and increases corrosion resistance.

- **Passivation Treatments (AMS-QQ-P-35A & AMS2700):**
Enhances corrosion resistance in stainless steels.

Chemical Treatments

Certified under ISO 9001:2015, AS9100D, Nadcap AC7108:

- **Chemical Cleaning:** Removes oils, greases, and residues from manufacturing processes.
- **Chemical Etching:** Cleans, polishes, and textures metal surfaces.
- **Acid Pickling:** Removes oxides and impurities from metals.

Surface Finishing Services

- **Sand Blasting:** Cleans and textures surfaces using high-speed sand blasting.
- **Powder Coating:** Offers a durable, corrosion-resistant finish in various colors.
- **Top Coat:** Applies top layers of paint for aesthetic finish and added protection.
- **Masking:** Protects specific areas during painting and coating processes.

Additional Coating

- **Zinc Plating:** Protects steel against corrosion through a metallic zinc coating.
